

# POLYFOAM SIL Conc.

## Silicone derivatives-based anti-foam

**Properties** : - is a versatile silicone antifoam.

- has low viscosity, and then can be metered easily.
- has high resistant to acids and alkalis.
- is suitable in a broad range of pH.
- is an useful auxiliary for combating foam generated in surfactant-containing formulations.
- imparts excellent anti-foaming properties and also acts as a defoamer; it means that, can prevent of the formation the foam and also combats the foam which existed.

### Field of application

- Substrate** : all fibers
- Aggregate** : all procedures
- Operation** : anti-foam and defoamer

### Characteristics

- Type of product** : silicone emulsion; nonionic
- Appearance** : milky white liquid

### Application

- Dissolving method** : can be diluted with water in any ratio.
- Guide recipes** : depending on the system to be defoamed, 2 – 6 ml/l **POLYFOAM SIL Conc.**
- Storage stability** : at least 6 months in its original package and at room temperature.
